The ABO blood group system is used to denote the presence of one, both, or neither of the A and B antigens on erythrocytes. In human blood transfusions it is the most important of the 36 different blood type (or group) classification systems currently recognized. A very rare (in modern medicine) mismatch in this, or any other serotype, can cause a serious, potentially fatal, adverse reaction ...

He determined that a monk who had arranged for his lover to have an abortion was not guilty of murder if the fetus was not "animated" at the time.: Early in the 13th century, he stated that the soul enters the body of the fetus at the time of "quickening" - when the woman first feels movement of the fetus. Before that time, abortion was a less serious sin, because it terminated only potential ...
