My 'basic' fruit fly research could help save lives. Politicians like Sarah Palin love to mock it, but here's why we should all support 'basic' research

My 'basic' fruit fly research could help save lives - Massive

Butterfly adults are characterized by their four scale-covered wings, which give the Lepidoptera their name (Ancient Greek λεπίς lepís, scale + πτερόν pterón, wing). These scales give butterfly wings their colour: they are pigmented with melanins that give them blacks and browns, as well as uric acid derivatives and flavones that give them yellows, but many of the blues, greens ...

Impossible Evolution. Refuting evolution doesn't require complicated equations or lab experiments—though those do the job, too. Just remember the two fundamental flaws we can use

to show evolution to be not even scientifically viable.

Evidence Against Evolution | Answers in Genesis

It only takes a single fly to alight on your picnic lunch to make you uneasy about what germs may have landed with it. But what harm can come from a fly landing on your food? Should you throw it away?

Should I throw away food once a fly has landed on it?

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.
