Biology Guided 53 Answers

x Epidermal cells are positioned on the most out layer of skin and thus have the potential risk of being exposed to environmental factors. The biological effect of ionizing radiation (IR) on the skin tissue is a significant problem for medical applications, such as radiotherapy for cancer treatment.

Genome editing, or genome engineering, is a type of genetic engineering in which DNA is inserted, deleted, modified or replaced in the genome of a living organism. Unlike early genetic engineering techniques that randomly inserts genetic material into a host genome, genome editing targets the insertions to site specific locations.. In 2018, the common methods for such editing use engineered ...

Come visit and explore at The Morton Arboretum, a living museum for nature lovers of all ages. Pets aren't allowed in vehicles or on the grounds, except for on specially designated days.

VISIT & explore | The Morton Arboretum

I have noticed .pyc files spontaneously being generated when some .py file of the same name gets run. What is the difference between .py and .pyc files?. Also, I find that having .pyc files lying around clutters up space. Should one delete .pyc files? Or is there a benefit and/or necessity to having them around?

python - What is the difference between .py and .pyc files ...

[1] The research was funded by the Ministry of Education and Training of Ontario (Canada), the Social Sciences and Humanities Research Council of Canada, and four Ontario school districts. The views expressed in the article do not necessarily represent the views of the Ministry, Council or the school districts.
