Curious kids turn into junior scientists with these preschool science experiments and beyond! This collection of early elementary, kindergarten, and preschool science experiments and activities has brought us such joy in learning over the past 5 years! At the age of 3 (he's 8 now), my son experimented with his first baking soda and vinegar reaction experiment.

### **Preschool Science Experiments and Science Activities**

How acidic or basic something is can be measured by a scale called pH, which ranges from 0 to 14. For example, an acidic pH is below 7, such as lemon juice or vinegar. A basic pH is above 8, such as baking soda or bleach. A neutral pH is about 7, which is typically the pH of water. For more on these topics, see the Science Buddies webpage on Acids, Bases, & the pH Scale.

The My Little Pony franchise debuted in 1982, as the creation of American illustrator and designer Bonnie Zacherle. Together with sculptor Charles Muenchinger and manager Steve D'Aguanno, Zacherle submitted a design patent in August 1981 for "an ornamental design for a toy animal". She was then working for Hasbro. The patent was granted in August 1983.

Hello. I'm a wannabe writer IRL, who is using fanfiction to hone his mediocre skills. And who has, apparently, managed to do a number of firsts on this website, as far as I can tell: the very first crossover for A for Andromeda, one with Harry Potter called L for Luna, and the first crossover for the Quatermass serials, with Doctor Who, known as Quatermass and the Doctor.
