Recall from lecture: A Java program must be compiled, or translated into binary instructions. Then it can be executed or run. When you run a program, it displays output messages to the user in a text window called a console. For our first exercise, let's compile and run a short program that we will provide to you. (See the following slides.)

There are so many CodeLab exercises (200+) that cheating becomes a pain in the neck. It is much more of a bother to post somewhere 200 separately copied/pasted solutions than to post 10 major homeworks. Likewise it is more of bother to copy/paste such solutions in to the exercises. The net "saving" just isn't there.
