1. Introduction. Almost half a century ago, David Ausubel suggested that the most important factor influencing learning is what the learner already knows, that teachers should ascertain this, and teach accordingly (Ausubel, 1968). At the time, and perhaps even now, such a prescription might seem simple, but students do not learn what they are taught.

The scientific method is an empirical method of acquiring knowledge that has characterized the development of science since at least the 17th century. It involves careful observation, applying rigorous skepticism about what is observed, given that cognitive assumptions can distort how one interprets the observation. It involves formulating hypotheses, via induction, based on such observations ...

Temperature is another important variable. The above properties were measured at room temperatures. As temperatures increase up to the limit of 1,063°F (573°C) mentioned in Endnote 81, the piezoelectric coefficient increases and breakdown voltages decrease—both contributing to more extensive and powerful plasma production.. 81.

Introduction. When we 'teach' listening in class there is a fairly standard approach, which involves setting the topic, pre-teaching some vocabulary, setting some gist questions, playing the audio, checking the answers and then setting an intensive task (comprehension questions, true/false, complete the table, fill in the blanks, etc).
