Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes regional, national, and global economies. Macroeconomists study aggregated indicators such as GDP, unemployment rates, national income, price indices, and the interrelations among the ...

A day may come when the old guard of macroeconomics convinces this starry eyed graduate student to give up his long battle against the evils of DSGE models in macroeconomics. But it is not this day. Shockingly, it seems like many top economists have not yet discovered my superior critique of macroeconomics (because obviously if ... Continue reading "Here We Go Again"

The Other Mainstream. But despite its hegemony over the peak institutions of academic economics, this mainstream is not the only mainstream. The macroeconomics of the policy world — central bankers, Treasury staffers, Financial Times editorialists — only intermittently attentive to peer-reviewed journals in the best of times, has gone its own way; the pieties of a decade ago have much less ...

How a Decade of Crisis Changed Economics - Evonomics

The central point of my Jacobin piece on the state of economics was meant to be: Whatever you think about mainstream macroeconomic theory, there is a lot of mainstream empirical and policy work that people on the left can learn from and engage with — much more than there was a decade ago. 1 . Some of the most interesting of that new work is from, and about, central banks.
