

Phet Photoelectric Effect Answers

Phet Photoelectric Effect Answers

Recommended software downloads: Below are links to general freeware programs that I highly recommend for learning chemistry.

Honors Chemistry - Darrell Feebeck

Camera lens often have an antireflective coating. This thin film of transparent material reflects part of the light at the first surface and part at the second. The two reflected waves interfere destructively to cancel out the reflection. Here is an animation from Paul Falstad. This is a wave incident on an antireflective layer. This is the same wave but no antireflective layer. Have a look at (HL ...

IB Physics: Thin film teachers notes

A simple pendulum has a small-diameter bob and a string that has a very small mass but is strong enough not to stretch appreciably. The linear displacement from equilibrium is s , the length of the arc. Also shown are the forces on the bob, which result in a net force of toward the equilibrium position—that is, a restoring force.
