A genealogical DNA test is a DNA-based test which looks at specific locations of a person's genome, in order to find or verify ancestral genealogical relationships or (with lower reliability) to estimate the ethnic mixture of an individual. Since different testing companies use different ethnic reference groups, consisting of now living test persons with unknown pre-census time origins, the ...

Have you ever wondered what you would do if you could make a clone of yourself? Most scientists believe that it is very possible to do so by understanding the genetic make-up of a person though it has not been made possible. Well, I won't say it has not been done, cuz there is already a cloned sheep you probably know about. Do you need some help understanding DNA replication?

Matrilineality is the tracing of kinship through the female line. It may also correlate with a social system in which each person is identified with their matriline - their mother's lineage - and which can involve the inheritance of property and/or titles. A matriline is a line of descent from a female ancestor to a descendant (of either sex) in which the individuals in all intervening ...
