

## *Solutions A2 Workbook*

### **Solutions A2 Workbook**

Hi, Hope someone can help me out on this. I'm trying to copy several columns from 1 workbook (Source File.xls - "sheet1") to another workbook (Target File.xlsm - worksheet ("final")).

### **Copy specific columns from one workbook to another workbook**

Sub Compare\_Values() '//Procedure will: ' 1) Compare values on cells A2:Q100 on two sheets ' 2) Write differences to a third sheet ' 3) Added code to place original value in cell comment ' Note: this version hard codes sheet names ' and places output in a new workbook - the ' actual final version should address how worksheets ' are identified.

I've made a XY scattergram that I want to copy for use to other workbooks with other data series. The exact part of the data series to be displayed in the chart varies between workbooks. In the data series for the chart, I'd like to include an indirect reference that will define the first and the last data point to be displayed. How can I achieve this?

### **how do I define a chart series with an indirect reference ...**

There may be times when you need to ask the user to select a location to save a file. This can be done using a save file dialog. Keep in mind that a save file dialog doesn't actually save anything. It only returns the full path the user has selected to save the file. There are several different methods for creating a save file dialog. One of the methods is explained in the article Excel VBA ...

How you go about making a decision can involve as many choices as the decision itself. Sometimes you have to take charge, and decide what to do on your own, but you don't want to appear autocratic to your team (particularly in situations where you need their input). At other times it's better to ...
