Hi Carl, as always a great article on configuring mandatory user profile. I have a question for you on whether it would be prudent to not use any profile management for a non-persistent Call centre VDI use case where users have a standard set of application and they log in using generic user id's based on desk id's and furthermore user do not needs to save any personal files or even IE ...

Introduction. Network Administration is a field that has an enormous amount of responsibility associated with it. Despite the fact that it sounds like a relatively straightforward concept at the outset - keep the systems talking to each other- that simple phrase covers a multitude of different compatibility issues, operating systems, troubleshooting techniques, the list goes on and on and on.
