Formative assessment, including diagnostic testing, is a range of formal and informal assessment procedures conducted by teachers during the learning process in order to modify teaching and learning activities to improve student attainment. It typically involves qualitative feedback (rather than scores) for both student and teacher that focuses on the details of content and performance.

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's  $d$ ). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

### **Hattie effect size list - VISIBLE LEARNING**

4 1 Make the curriculum work for you - connect the "big ideas" to the daily questions and interests of your students. 2 Design learning opportunities that encourage students to explore authentic, "real-life" experiences based on these curriculum expectations.
